

###Rental Car Website Functionality Status###

Step-by-Step Functionality Check:

1. **API Integration:**

- The API is functioning correctly, retrieving car data with a status code of `200`.
- Error scenarios (e.g., API down) are handled gracefully, displaying user-friendly error messages.

2. **Responsiveness:**

- The website adjusts properly to different screen sizes (desktop, tablet, mobile).
- All elements (e.g., car listings, buttons, forms) are displayed correctly across devices.

3. **Rent Option:**

- Users can select a car, choose rental dates, and proceed to book.
- The rent option updates the booking details in real-time.

4. **Show More Page:**

- The "Show More" button loads additional car listings dynamically.
- Pagination or infinite scrolling works as intended.

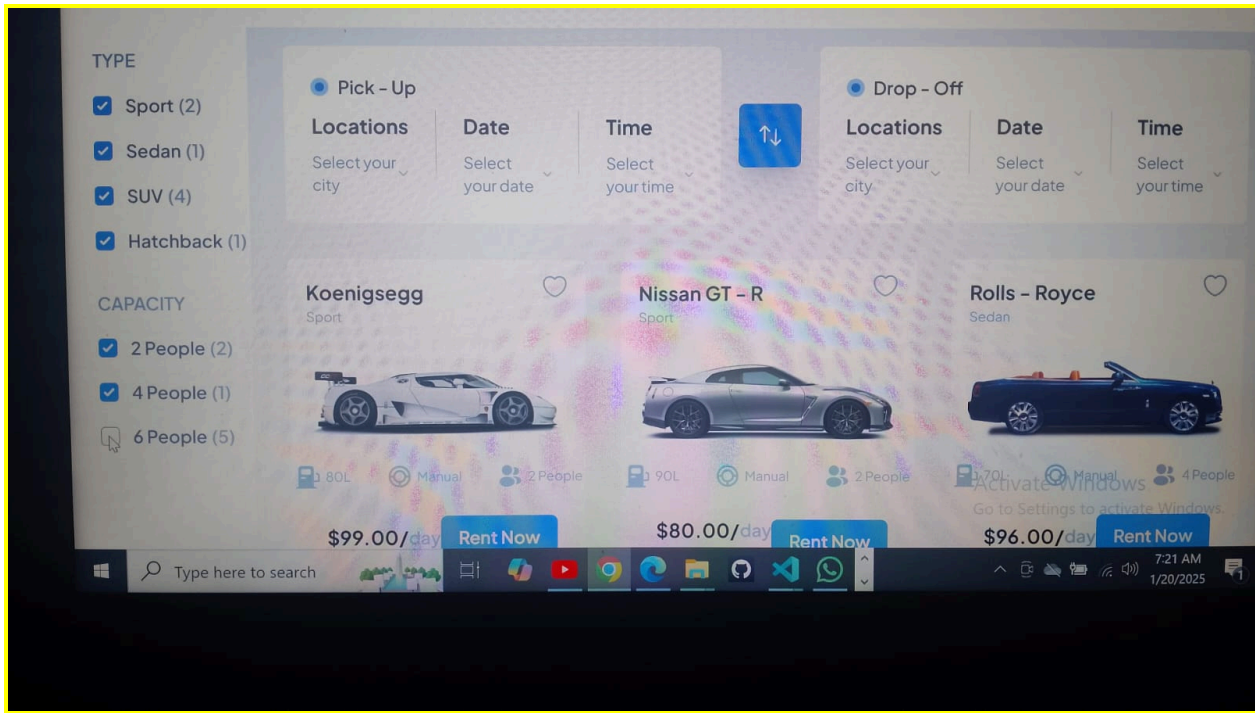

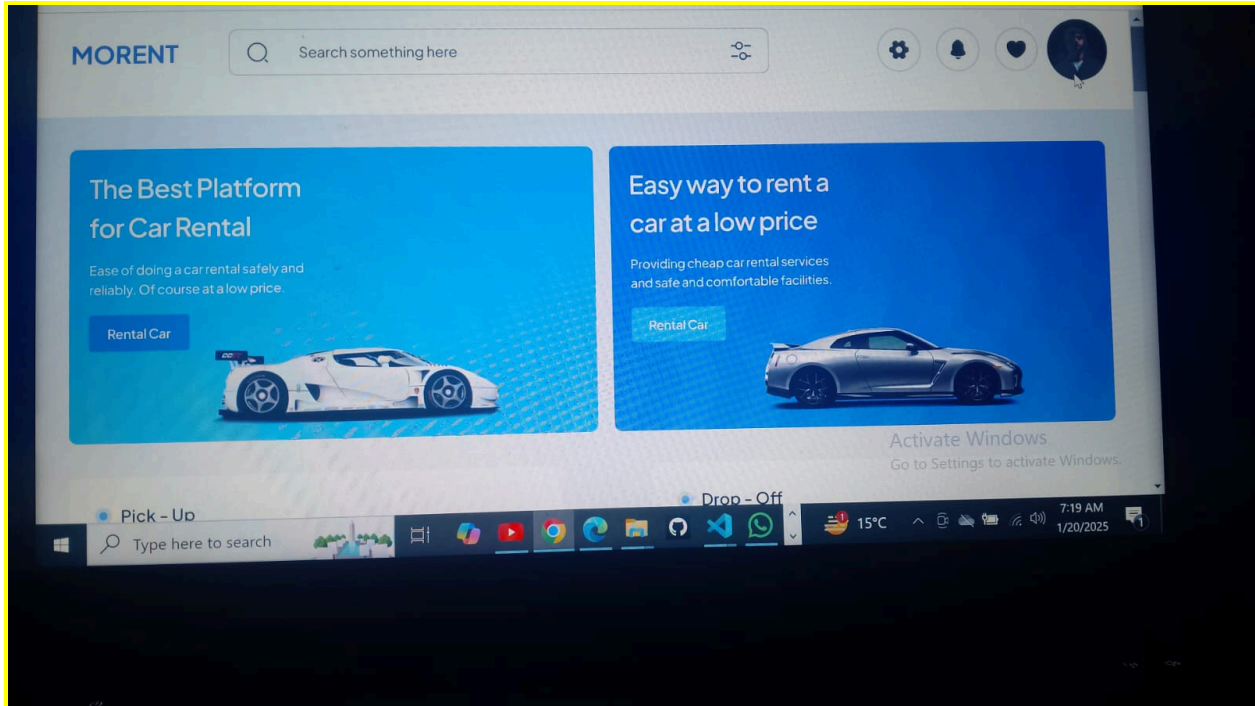

5. **Map Integration:**

- The map displays car locations accurately.
- Users can interact with the map to view available cars in specific areas.

6. **Billing Option:**

- The billing section calculates the total cost based on rental duration and car type.
- Payment gateway integration works smoothly, processing payments without issue.
